

Carbon Credit Program Overview

As a responsible farmer and land manager, you have taken important steps toward conserving our nation's valuable natural resources. Do to these conservation-based land management decisions; you might also be eligible to earn additional income from your farm or forest parcels by selling carbon credits.

Landowners earn these payments for storing carbon in their forests and soils through Dogwood Carbon's linkage with the Chicago Climate Exchange (CCX) and other carbon buyers. Right now, three categories of eligible practices are available for participation in the available carbon markets:

- Grasslands that have been seeded into former croplands since 1999
- Rangelands under sustainable grazing plans (with NRCS approved grazing plans)
- Trees that have been planted into former crop or pastureland since 1990.

As a voluntary program in the private sector, carbon credit payments align perfectly with government incentive programs such as the Conservation Reserve Program, Environmental Quality Incentive Program and Wildlife Habitat Incentive Program. **Carbon payments DO NOT disqualify participants from any government payment programs.** In fact, one of the largest segments of the carbon market thus far is CRP grass acres in the West.

To enroll in this program, fill out the attached landowner profile, parcel application page and Project Checklist. Then send them to us at Dogwood Carbon Solutions, P. O. Box 30020, Columbia, MO 65205. More information is available at www.dogwoodcarbon.com or by calling our toll-free enrollment line at 1-888-829-0084. We look forward to working with you.

If you enroll by August 5th, 2008, your credits will be marketed by the spring of 2009. This is your last chance to cash in on carbon credits for 2008. Please send in the paperwork quickly to ensure that you are part of this unique opportunity.

We look forward to working with you.

Rangeland Project Enrollment Requirements

To enroll your rangeland acres, please take a few minutes to review the list of documentation required to be issued your carbon credits. Any parcel that has been converted to sustainable grazing practices through USDA-approved programs are currently eligible. A NRCS grazing plan or a similar document is required. Once we receive the following documents, we will issue you a carbon credit contract and you will be ready to earn carbon income.

Application Material Checklist

- 1.) I have completed a Client Information Form (see enclosed)
- 2.) I have completed and attached Tract Description Form/s (see enclosed)
- 3.) I have included a copy of my FSA annual reporting form (Form 578 at the local FSA office).
- 4.) I have included a copy of the areal FSA map and legal land descriptions for each tract
- 5.) I have included my NRCS grazing plan (or a similar plan from other sources)
- 6.) I have included proof of stocking density and seasonal range management

Return Completed Application by August 5th, 2008, to

Dogwood Carbon
